COORDINATING COMMITTEE

MEMORANDUM BY THE FRENCH DELEGATION

EXPORT OF 619 QUARTZ CRYSTALS TO POLAND

The French Delegation wish to inform the Committee that a licence has been requested for the export to Poland of 619 quartz crystals, Type CR - 6/U, covered by Item 1587 on the Embargo List and valued at NF.5,709.25, i.e. about \$1140.

The characteristics are as follows:

- Type CR 6/U
- Case FT 243
- Interaxis 12.35 mm (distance between the two contact spindles)
- Diameter of spindles: 2.4 mm
- (*) Temperature range extending from -20 to +60°C.
- Frequency tolerance $\pm 5 \times 10^{-5}$ for temperatures from -20 to +60°C.
- Test oscillator: TS 330 TSM
- With load capacity 13 pF
- for 15 frequencies situated between 3,345.833 Kc/s and 10,230.000 Kc/s
- The net weight of these quartz crystals is 9.350 kgs.
- Gross weight " " " " " 15.450 "
- The unit value is NF. 10.40 in the case of 264 of the crystals
- and NF. 8.35 in the case of the remaining 355.

These quartz crystals have been ordered by the "Elektrim" purchasing group and are intended for radio-telephone equipment installed in the ambulances of the Polish Ministry of Health.

The French Delegation can assure the Committee that these quartz crystals, which are of an old design, have now been considerably outdistanced and are no longer used in France in military equipment less than 5 years old.

The usual guarantees as to non-reexportation will be obtained.

The French Delegation are submitting the present request under the special Polish procedure and, in view of the humanitarian use for which the consignment is intended, they trust that no objection will be raised.

They would be glad to have the views of Member Governments on this proposal as soon as possible.

(*) This temperature range differs from the normal range of the CR 6/U type which extends from -40°C to +70°C.

~~CONFIDENTIAL~~
